

Sep. 14, 1987

Dear Lorraine,

We both enjoyed visiting with you very much. No, you didn't talk too much - it was interesting. And thanks for the things you gave me. The relationship chart is quite unique - I'm going to send a copy to Elvin. He will enjoy seeing it.

You have several lines I don't have which is great. I'm wondering just how to handle the source - shall I just put in your name, or if most of the information came from one person should I put down their name also - Specifically I was thinking about those of the David Grantz

line which I am now checking  
over - Elizabeth Frantz Houtz

David Frantz - Catherine McInty

(I think this is Thomas Beardsley?)

Abraham Frantz - Catherine Houtz

(would this be L. L. McIntire?)

Jacob Frantz - Mary Ebersole

(was this mostly from Gloria Cox?)

Lydia Frantz Zigeler

Susanna Wolfe

we forgot to mention - if you want  
to come down without your trailer,  
we have room for you to sleep. I  
should say most of the time. Our  
daughter Shirley & 2 little boys are  
planning on being here several days  
this week, but you could call first.

I would like to check over  
the Harry W. Frantz paper some more.

His theory is interesting - I hadn't heard it before.

At one time Dore Frantz had stated that David's wife, Elizabeth Garst, was the daughter of DelWalt Garst instead of John Nicholas Garst - I wonder if L.L. McIntire mentioned this at all. I would like to look over his material again also.

I'm making a list of all the discrepancies in the David Frantz line, then checking out my sources - hopefully we can eliminate at least some of the differences.

Thanks again for your hospitality and suggesting a delightful place to eat. We're looking forward to seeing you again.

Love Hazel

Dear Lorraine,

I imagine you are busy getting ready for your trip. I haven't done anything on genealogy since you were here, but hope to send you more when you get back.

I sure hope what I have sent you so far isn't too confusing, but probably no more so than some of the other things you have received.

We sure enjoyed your coming over, and it was

so interesting to look over your material - thanks so much -

I'm sorry we got you to thinking about some of your sad memories, but perhaps it was good for you to have someone to tell it to. As you said, being alone - not even a roommate now, doesn't leave you many to confide in. Hopefully, your pleasant memories exceed your unpleasant ones, and even though you have had a lot to contend with, you seem to be handling it just fine.

Do have a good time on your trip and let us know when you get back.

Love  
Hazel

Oct. 17, 1987

Dear Lorraine,

I wonder if you are home yet or did you decide to stay in Mich. It sounded like you were really enjoying yourself. I'm so glad. A person needs a different experience once in a while. Its so easy to get in a rut. We might go to Fla in Febr. for a mini-family reunion.

We haven't gotten a computer yet. Our son is checking out a few things - a friend of his might be upgrading his and want to sell his old P.C. We thought it might

be helpful to have the genealogy  
program to try out, so if  
you will send your genealogy  
program we will appreciate it.  
Enclosed \$5.00, If I want to  
become a registered owner, do  
I deal with the programmer or  
with you.

Do you have a roommate  
yet? were you glad to get  
back to work and to genealogy?

Our son Bill just came  
and I must get this in  
the mail.

Love,  
Hazel

12 Dec 1987

Dear Lorraine,

This is my first letter using our new computer. Today we installed the programs for the genealogy database. Everything is working fine so far. I am getting anxious to try out some of the options.

I am using a word processing program called Blackbeard. It works very well. It was written by a friend of Dan's.

There will be a lot to learn, but it is a lot of fun. Dan is a big help. We wouldn't know what to do if he didn't show us.

How are things going for you?

I'm going to send this to the printer before something goes wrong.

Love,

*Hazel*
